I'm a fan of recent releases by PixelZator and Petapixel , and I'm excited to dive in to Photoshop myself. The build I've got is, of course, CS6. All of the recent features I'll be exploring are new, but the most important icon on the screen (the red circle) is still there, and appears when a preference is changed to let you know Photoshop is indeed listening. That's key, because the version number may have changed to CS24 or PS24, but under the hood, it's still the same old software. I certainly don't recommend buying a new version unless you want to benefit from all the new features, upgrades, and performance enhancements.
