## Wipe Free Space GUI X64

Wipe Free Space GUI Free Download is an easy to use application designed for secure erasing of free space on file systems to prevent recovery of deleted sensitive data. This program will securely wipe the free space on an ext2, ext3, ext4, NTFS, XFS, ReiserFSv3, ReiserFSv4, FAT12, FAT16, FAT32, MinixFSv1 and MinixFSv2 partition or drive, just like the shred program securely wipes files. System Requirements: Compatible with Microsoft Windows XP/Vista/Windows 7/Windows 8/Windows 8.1/Windows 10 x86/x64 License: Freeware Secure Wipe Free Space GUI is an easy to use application designed for secure erasing of free space on file systems to prevent recovery of deleted sensitive data. This program will securely wipe the free space on an ext2, ext3, ext4, NTFS, XFS, ReiserFSv3, ReiserFSv4, FAT12, FAT16, FAT32, MinixFSv1 and MinixFSv2 partition or drive, just like the shred program securely wipes files. This is a next generation secure erase utility as it can secure wipe data written to the hard drive. For example: if you do a simple "del", you'll only get a "deleted" file in the recycle bin. But if you use this utility and then format the partition, the data you wrote to the partition is unrecoverable. How it Works: This program securely erases the free space, instead of overwriting the data on the partition. As this is an invisible process, it will not be detected by the operating system. - SuperNova is the most advanced FREE and CHEAP reliable data eraser available today. - SuperNova requires Windows XP, Windows Vista, Windows 7 and Windows 8 to work. - SuperNova takes advantage of the SAFETY FEATURE that makes the NTFS file system UNRECOVERABLE AFTER WIPE! - SuperNova is also SAFE for use on RAID arrays, making it the most advanced FREE and CHEAP secure eraser available today! - SuperNova is a next generation secure erase utility as it can securely wipe data written to the hard drive. - With SuperNova, all hard drives can be securely wiped out! - SuperNova is the most 2edc1e01e8

From the makers of free MS tool to wipe free space in less than 20 seconds and no longer need to follow complicated instructions: the Wipe Free Space is a very easy to use utility. The main function of the program is to help you securely erase a part of the free space on an ext2, ext3, ext4, NTFS, XFS, ReiserFSv3, ReiserFSv4, FAT12, FAT16, FAT32, MinixFSv1 and MinixFSv2 partition or drive. Just select free space on the destination disk (partition) that you want to wipe, and the program will securely erase the free space on that drive. The free space on the partition can be up to 64GB. The program supports all NTFS, ReiserFSv3, ReiserFSv4, FAT12, FAT16, FAT32, MinixFSv1, MinixFSv2 and Ext2, Ext3, Ext4 drives. Before wiping free space, you need to select an erase mode for the partition. The modes include Wipe Free Space, Skip Free Space, Erase All, Wipe Free Space and Skip Free Space. If you select Skip Free Space mode, you will not erase the free space on that partition; instead, you will wipe out all the files in the free space on the partition. The last and most secure mode is Wipe Free Space mode, which will completely erase the free space on the partition. The Wipe Free Space is easy to use with just one click. You just need to enter the source and destination disks for free space and then select an erase mode. Once you are done, you can start to wipe free space on the disk that you have selected, and the program will securely erase the free space on that partition or drive in just a few seconds. The Wipe Free Space supports drag-and-drop function. The source or destination disk for free space can be dragged into the main window to set it as the source or destination drive for wiping free space. There are also two buttons: "Wipe" and "Skip" for making quick configuration of wiping free space. The Wipe Free Space can read the current free space on the source or destination drive and displays it for you to select the free space you want to wipe. The Wipe Free Space is completely virus and adware free. It was not possible to find a better program for securely wiping free space. Wipe Free Space is the best free tool for securely erasing free space on file systems to prevent recovery of deleted sensitive data. Wipe Free Space has many features: It is the only completely virus and adware free tool to securely wipe free space. It can wipe free space for all file systems, including
