Navigation V9 Europe Mfd2.Q:
How to use "groupBy" in scala?

How to get the sum of the value in range(0,5) for each month in my List? I wrote this below code to do this but it does not compile

```
import
scala.collection.immutable.ListM
ap val months = (1 to
12).map(_.toString).toList var
groupedMonths: ListMap[String,
List[Int]] =
months.groupBy(_.toLowerCase)
```

A: Lists are unordered. Grouping by an arbitrary ordering is not possible, you can write your own OrderedMap[String,List[Int]] to do what you want but there's probably a more idiomatic

solution to solve this. You can, for example, use a Map with custom keys to solve this: val months = Map(1 -> List(1,2,3,4 04aeff104c
