Protect My Disk Crack+ X64 (2022)

Free App Size: 2.07MB OS Version Support: Windows 7 Price: Free Similar software: N/A Protect My Disk Download With Full Crack 5.0 Publisher's description Protect My Disk Cracked Accounts 5.0 is a special antivirus, which protects your removable drives against malicious autorun.inf files. Protect My Disk Crack For Windows scans your PC for autorun.inf files, which are mainly associated with malicious software. If a file is detected, the program displays a message which contains relevant information about this file. Besides, the application can restore the original files if they have been damaged by an autorun.inf file. Properties of a file that are displayed include: • File name • File size • Date modified Sponsored Links Protect My Disk 5.0 Review by Expert ratings Expert rating Protect My Disk Time is what everyone is looking for. Especially on the Internet. Unfortunately, millions of users are victims of malware every day. If it's spread around the Internet, it is more and more likely to be a threat to your system. Virus spread by removable drives is not the exception. In fact, the percentage of infections on removable drives is the highest among all types of malware. However, the number of removed USB sticks and drives is constantly growing. Problems with removable drives are complicated. A simple autorun.inf can bring your PC to its knees. What's more, there are no standard antivirus programs that can check all removable drives and act accordingly. Unfortunately, a good antivirus program can't detect all autorun.inf files, so you will need to install Protect My Disk. This free software is designed to protect your data, as well as your PC. How to use Protect My Disk? To start with, Protect My Disk is a free tool, so it can be downloaded and installed. Don't forget to add the application to your list of favorite applications in the Control Panel. After installation, Protect My Disk is installed on your system. If you want to keep your data on removable drives safe, click on the menu icon and select "Settings". In the settings window, you can adjust the number of scanning processes to be run automatically. Next, configure the access level for USB drives, including the number of processes that are run. If your PC has a good antivirus program installed, you can skip this step. Next

Protect My Disk Crack+ Keygen For (LifeTime)

Protect My Disk Crack + Free

Turn off all unused drives Keep your data on the right places View protection status Protect drives at the press of a button 2) FSelector FSelector is a free utility developed by Leidensya and it's one of the most well-known utilities for cleaning up your system. While FSelector includes some basic cleaning functions such as Disk Cleanup, Registry Scan and Startup Cleanup, it's also a Free Startup Manager. Packing a lot of features into a single tool, FSelector allows you to easily modify the registry, reboot and shut down computer from a single interface. Interface FSelector's interface is simple, packed with all it needs and organized in a clean and intuitive way. You'll find a list of icons that offer quick access to the main features, such as Startup, Reboot and Shutdown. Procedures After launching the software, you can choose between following the prompts on its own or configure them as desired. It's up to you whether or not you want to tweak a few registry settings, reboot your computer, shutdown it or perform both at the same time. In case you need to reboot your system, you'll need to choose the reboot button. As for shutdown, you can select the menu at the top right corner or click the Reboot button. In the latter case, the software will reboot your computer after you're done, keeping your data safe and intact. Updates So far, FSelector supports many platforms, including Windows XP/Vista/7/8, as well as Linux, so you can easily install and use it on multiple OSes. Moreover, you can check for updates on the software through a Built-in Update Manager that will help you stay updated on the latest versions of the program. Basic cleaning FSelector features a basic disk cleanup tool, that's helpful in case your system is suffering from overgrown junk files. Before applying the cleaning, you need to select the drive you wish to clean. Recovery The utility provides you with a recovery tool that allows you to easily perform disk recovery if your system has gone bad, for example, if the OS needs to be re-installed or it is corrupted and needs to be restored. FSelector Features: Startup Manager Perform disk cleaning Recovery Update manager Easy to use Support many platforms Clean your registry View
